

RACK STUDS™

A revolutionary replacement for cage nuts which are used to mount IT, PRO A/V, Security, and Telecommunications equipment in 19" racks. **Rackstuds™** make it much easier to mount your gear because they go from the front and provide you with a place to support your equipment while you spin on the lock nut. This makes inserting and removing **Rackstuds™** much quicker and assists with mounting even heavy equipment as it no longer needs to be balanced in one hand!

Rackstuds™ are much simpler, faster, safer and very strong.

Part Numbers:
RSL20
RSL100

For rails up to 2.2mm thickness
(Red Version)
